## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marsais et al (5526873) in view of Knecht et al (200300337913).

Marsais et al disclose a low temperature heat exchanger 10, an equipment (intercooler) heat exchanger, a pump "P", and a bypass line 124. However, the construction of the equipment heat exchanger is not set forth. Knecht et al disclose an intercooler in figure 3 that may be arbitrarily dividing into two sections, with, for example, one section having a single plate, and the other section the remaining plates. The result of which is the other section having a greater flow rate than the first.

Claims 2, 3, and 7-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
